

2018 TERMIS World Congress

September 4-7, 2018, Kyoto International Conference Center, Kyoto, Japan

We are pleased to announce the Tissue Engineering and Regenerative Medicine International Society, Inc. (TERMIS) World Congress 2018 in Kyoto; the premier event for the dissemination of cutting edge research in tissue engineering and regenerative medicine. This Congress is co-hosted with The Japanese Society for Regenerative Medicine (JSRM).

The theme for the 2018 TERMIS World Congress is "Integration of Industry, Government, and Academia for Regenerative Medicine," reflecting the importance of strong cooperation of Industry-Government-Academia to realize tissue engineering and regenerative medicine. To this end, the 2018 scientific program will focus on the innovative technologies, legal regulation, and commercialization focused in tissue engineering and regenerative medicine.

Over a period of 1200 years, Kyoto has nurtured a splendid, delicate and unique kind of culture and over the course of history came to be considered the mother of culture within Japan. Kyoto is not simply protecting its old traditions and culture, but is rather building upon the rich traditions of predecessors as a foundation for open domestic and international exchange. We are honored to be able to host this important World Congress in Kyoto of the world's finest meeting place.

Dates:

September 5th to 7th 2018 (A Plenary Lecture and Pre-Congress-TERMEX 2018, a Plenary Lecture and Welcome Reception will take on September 4th)

Venue:

Kyoto International Conference Center
<http://www.icckyo.or.jp/en/>

Registration:

Late Registration deadline is before July 26th 2018
<https://www.termis.org/wc2018/registration.php>

Scientific Program:

Presidential Lecturers:

Rui L. Reis (3B's Research Group, University of Minho, Portugal)

Yoshiki Sawa (Osaka University Graduate School of Medicine, Japan)

Plenary Lecturers:

Yu-Chen Hu (National Tsing Hua University, Taiwan)

Juergen A. Knoblich (Institute of Molecular Biotechnology of the Austrian Academy of Science, Austria)

Jan Lötvall (Krefting Research Centre, University of Gothenburg, Sweden)

Philippe Menasché (Department of Cardiovascular Surgery, Hôpital Européen Georges Pompidou, France)

Antonios G. Mikos (Department of Bioengineering, Rice University, USA)

Gordana Vunjak-Novakovic (Columbia University, USA)

Masayo Takahashi (RIKEN, Japan)

Symposium Sessions:

We will have more than 90 sessions during 3 days of congress dates.
